Person (who called) (who was called) Mr. Paul A. Rice

Call (made by) (received by) Suzanne T. Billing

Summary: I phoned Mr. Rice to get info on  
the alleged asbestos at Eastern D M.

He lives within a 1/4 mile of site:

R.D. #2 Box 183, Tamagua, PA 18252

He said - just by looking at it and just the  
fact that EDM was stripping wire, he thought  
that asbestos was present at the site.

- a lot of wire had insulation.
- He doesn't know what "specifics" were ~~there~~  
might have contained asbestos.

- the alleged "asbestos" looked different from the  
paper ~~with~~ <sup>in</sup> the wire. -> It had a "cotton texture"

- the <sup>white</sup> material drifted & settled on the  
roof tops & on window sills within 1/4 mile radius of site.

- When fighting fires at the site, the firefighters  
saw the white material floating around.

- never sampled to see if it was asbestos
